w/o Data

Use your knowledge to answer the following question:

Q: Are the White Blood Cell (WBC) counts within the normal range?

A:

A:

w/o Data CoT

Use your knowledge to answer the following question.

Answer with "Yes" or "No" and provide supporting evidence. If you cannot determine the answer, respond with "Not sure enough."

Q: Are the White Blood Cell (WBC) counts within the normal range?

Let's think step by step.

Self-Refinement

Please review the question based on the structural data and related answer.

Data:

| Test | Result | Reference Range| |------| | WBC | 15000 | 4000-11000

Q: Are the White Blood Cell (WBC) counts within the normal range?

A: No. The WBC count in the data is 15,000, which is above the normal reference range of 4,000 to 11,000.

Please provide feedback and suggest any corrections or additional information that could enhance the answer's accuracy, relevance to the data, or clarity. Conclude with your refined answer with only "Yes," "No," or "Not sure enough". Feedback:

Format Instruction

Given structural data and a related question, please provide your answer. The given data is in markdown format. Columns in the table are separated by '|', rows are separated by '\n', and list elements start with '*'. Only answer with "Yes" or "No." If you cannot determine the answer, respond with "Not sure enough." Data:

| Test | Result | Reference Range| |------| -------| | WBC | 15000 | 4000-11000 | Q: Are the White Blood Cell (WBC) counts within the normal range? A:
