Prefix Prompt

You, the 'ego' car, are now driving a car on a highway. You have already drive for 6 seconds.

The decision you made LAST time step was keepspeed. Your explanation was `Maintaining the current speed and lane is chosen to ensure safety by keeping a safe distance from the vehicle ahead and adhering to the rules against frequent lane changes. This decision promotes safe and predictable driving behavior.`.

Here is the current scenario:

Please make decision for the ego car. You have to describe the state of the ego, then analyze the possible actions, and finally output your decision.

There are several rules you need to follow when you drive on a highway:

- 1. Try to keep a safe distance to the car in front of you.
- 2. If there is no safe decision, just slowing down.
- 3. DONOT change lane frequently. If you want to change lane, double-check the safety of vehicles on target lane.

Let's think step by step. Once you made a final decision, output it in the following format:

Final Answer:

"decision":{"ego car's decision, ONE of the available actions"},

"expalanations":{"your explaination about your decision, described your suggestions to the driver"}
